UV Oil forms an extremely thin film on the surface of the wood. It becomes part of the wood, therefore it permits the wood to breathe. The finish is thin and flexible and it is able to take an impact rather than chipping or flaking away. The finish appearance is a beautiful low luster satin finish which also helps to hide scratches and dents. UV Oil finish is an environmentally friendly product which contains no VOC.

SOUTH BEACH EUROPEAN OAK

4-SIDED MICRO-BEVEL

RANDOM LENGTHS - 24" - 48"
